Claims 86 and 87 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Some of the formulae are too light to be understood. For example in some structures the lines are so light it cannot be determined if single or double bonds are intended or even if bonds are intended. The claims should be resubmitted.

Further applicants should present the number of the each compound in explanatory text (not within the claim). For example the first compound of claim 86 is ER-805332.
